

Shradha Rai

Software Engineering — Python — Full Stack Development — Backend Development

☎ +91 7027354777 ✉ shradharai4u@gmail.com 🔗 linkedin/shradharai 🐙 github.com/Shradharai

EDUCATION

SRM Institute of Science and Technology, KTR, Chennai <i>B.Tech, Computer Science Engineering – Specialization: Big Data Analytics</i> CGPA: 9.19/10	2022 – 2026
Gaurs International School, Greater Noida <i>Class 12, CBSE – 92.2%</i>	2021

EXPERIENCE

AI Operations Associate Intern, Deccan.AI Worked on AI model evaluation and benchmarking for large-scale enterprise applications using multimodal text and image data. Reviewed model outputs against quality guidelines, identified failure cases and edge cases, documented observations, and helped improve dataset quality through structured evaluation. Collaborated with cross-functional teams to maintain consistent evaluation standards across production workflows.	Dec 2025 – Present
Research Program, Samsung PRISM, R&D Institute India Worked on a research project focused on microservices observability in distributed systems. Analyzed logs, metrics, and system events, experimented with different approaches, and built analysis pipelines to understand system behaviour. Documented findings and collaborated with a four-member team throughout the research process.	Dec 2024 – Jul 2025
Web Development Intern, Accenture Built responsive web applications using React.js as part of a three-member development team. Developed reusable UI components, integrated frontend features with backend APIs, fixed bugs, tested application functionality, and worked in an Agile development environment.	Jul 2024 – Aug 2024

SKILLS

Programming: Python, JavaScript, SQL, C++
Web Development: React.js, Node.js, Express.js, HTML5, CSS3, REST APIs
Databases: MySQL, MongoDB
Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook, Google Workspace
Software Engineering: DSA, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Agile/Scrum
Additional: Python, Streamlit, Pandas, NumPy, Scikit-learn, TensorFlow

PROJECTS

Spatio-Temporal Risk Intelligence Framework for Road Safety (<i>Python, XGBoost, SHAP, GeoPandas, Streamlit</i>) Built a district-level road safety analytics platform using accident, population, and spatial data from Tamil Nadu. Cleaned and analyzed the data, engineered risk-based features, trained XGBoost models to predict accident severity, used SHAP to explain model predictions, and developed a Streamlit dashboard to visualize district-wise insights and support decision making.
RehabitMind Platform (<i>MongoDB, Express.js, React.js, Node.js</i>) Built a full-stack wellness platform using the MERN stack. Developed REST APIs, designed MongoDB schemas, implemented responsive React interfaces, and integrated frontend and backend services. Added interactive assessments and motivational content while following Agile development practices.

ACHIEVEMENTS & CERTIFICATIONS

Hackathons: Smart India Hackathon 2023 (Internal Round, SRMIST); Flipkart GRID 6.0, Myntra Hacker Ramp, Google Solution Challenge 2024, Google Codesprint'23, Pixel X Designathon
Research & Leadership: Contributed to Neural Network-Driven Design in Turbomachinery at SRM; Innovation Manager, Cherry+ Network SRMIST; “ <i>Spatio-Temporal Risk Intelligence Framework for District Level Road Safety Analysis</i> ” – Paper accepted at ASSIC 2026, publication pending final review.
Certifications: AWS ML Foundations, Oracle Foundations Associate, NPTEL (Cloud Computing, Data Science for Engineers), Coursera – IBM Python for Data Science, Unsupervised Learning, Reinforcement Learning
